Members only section.

User Name: **IAMSlic**

Password: **BREST**

Please welcome the new members of the newsletter team: Lisc Lott, NOAA Coastal Services Center Library Charleston; Lea Wade-Torres, NOAA Central Library; Joan Parker, Moss Landing; Ruth Gustafson, UC Davis; and Stephanie Haas, DLC, UF.

From the President...

It is hard to believe that an entire month has already passed since the Annual Conference in beautiful Mystic, Connecticut. As with most IAMSlic conferences, I returned home with a fresh slate of stimulating ideas and potential projects gleaned from listening to and interacting with colleagues from around the world. The challenge is always to sort out which of those wonderful new possibilities to pursue, given the constraints of all the other competing priorities that place demands on our time and energy. Nonetheless, I am always amazed and impressed with the range, scope and depth of knowledge and expertise that the IAMSlic membership possesses collectively, despite our relatively modest size as an international organization. I hope that others who attended the conference came away similarly stimulated and that we will hear next year about some of the creative accomplishments that had their genesis during the time spent together in Mystic.

Of course, no IAMSlic conference is successful without a tremendous amount of work by a dedicated corps of volunteers, and this year was no exception. As some of you may remember, this year's conference was originally slated to be hosted by Eleanor Uhlinger in Newport, Rhode Island. When Eleanor left the Pell Library for her current position at the MBL/WHOI Library, Jan Heckman

of the University of Connecticut, Avery Point, graciously stepped forward to serve as the conference host and it is due to his leadership and outstanding efforts that we benefited from an extremely well-organized event and enjoyed the hospitality of his campus and the Mystic community. Rather than managing to escape her duties as the original host, Eleanor also ended up putting in countless hours behind the scenes and during the conference itself. We owe a debt of gratitude to the many others who worked with Jan and Eleanor to put the necessary arrangements in place: Mary Heckman, Ann Devenish and Paul O'Pecko handled a myriad of local planning details along with Jackie Riley and Liz Winiarz. Jackie once again put together a great conference website and Liz teamed up with Barbara Butler to manage this year's lucrative Guin auction. The conference had a solid cohort of sponsors and exhibitors due to the coordination of Snowdy Dodson and recruitment by the locals of support from the Northeastern Regional Aquaculture Center. Many thanks also to Amy Stout of the MBL/WHOI Library for the excellent presentation equipment and technical support. And last, but not least, we applaud the on-site volunteers from the University of Connecticut -- Ellen Anderson, Chris Schulz and chauffeur extraordinaire, Jeff Godfrey.

Of particular note at this year's conference was the large number of first-time IAMSlic conference

attendees, about one-third of the total participants. Both the formal program and the social atmosphere benefited greatly from this infusion of new energy and fresh perspectives. Quite a number of them have already taken on active roles in the organization by joining committees and work groups and through their presentations and poster sessions during the conference. You can read the impressions and observations of several of the first-timers elsewhere in this issue of the Newsletter. We extend a very warm welcome to all of them and look forward to their continuing involvement with IAMS LIC. We look forward to a similar influx at next year's conference in Hobart, Tasmania, as the focus of member outreach shifts to Oceania, the Pacific Islands and Asia over the coming months.

Steve Watkins
IAMS LIC President 2003-2004

Treasurer's Report, Submitted by Susan Stover November 26, 2002 – September 10, 2003

BEGINNING BALANCE November 26, 2002

Sally Taylor, Web page guru, mentioned that IAMS LIC re-signed with Louis Atkinson from Higher Mind for another year to make improvements to the site, and that the PDF version of the membership directory will be updated before the end of the year.

A First-timer's Guide to the IAMS LIC Conference

By **Lisc Lott**, NOAA Coastal Services Center Library Charleston, SC and **Lea Wade-Torres**, NOAA Central Library, Silver Spring, MD

As first-time attendees of the IAMS LIC conference, we were impressed and encouraged at the technology, breadth, and the global extent of this conference. IAMS LIC offered an opportunity to meet librarians and others from throughout the world with a deep interest in aquatic sciences information delivery and retrieval.

This year's IAMS LIC conference was an excellent experience for us. Our advice to other wannabe attendees is "just do it!" From learning about the ways others are creating online databases, to hearing about cooperative efforts between libraries, the conference helped us learn what is involved, the challenges that we face, and mostly how to be prepared for the future as marine science librarians. The energy that we perceived through the conference expanded our thought processes, gave us new ideas and reinforced a commitment to marine science as permanent library career. The conference itself is well-organized: presentations are offered consecutively, so an attendee doesn't have to miss anything. Registering for the conference is easy from the IAMS LIC web site, and because the conference is generally small, it is easy to get around between meetings. All information needs are taken care of for you, as well: maps or directions to the conference location, restaurant recommendations, and any tours that might be planned. One unusual and exciting aspect is the Guin auction, wherein attendees bring items from

their home countries, often with an aquatic theme, which are auctioned off silently during the conference. Funds raised during this event are added to IAMSLIC's Guin Fund, named for Marilyn Potts Guin who was vibrant IAMSLIC member before her untimely death. Guin funds provide IAMSLIC memberships and travel support for information professionals living in developing countries.

Attending this conference we believe that we accomplished a significant task: To foster partnerships between the Marine Protected Areas (MPA) Virtual Library: http://www.mpa.gov/mpaservices/mpa_library.html and holders of electronic archives resulting in greater international access to information. Our only regret was that we didn't prepare a full presentation on MPA.gov. We couldn't help but notice the interest, acceptance and general goodwill of our colleagues. There's always next year!

Call for 2004 IAMSLIC Grant Proposals

[Available on the Web at
<http://www.iamslc.org/activities/grants.html>]

The purpose of IAMSLIC is to provide an association for individuals and organizations with an interest in library and information science, especially as it applies to the recording, retrieval and dissemination of knowledge and information in all aspects of aquatic and marine science and their allied disciplines. The Association is supportive of efforts to enhance the ability of developing countries to create, access, and share information.

As funds are available, IAMSLIC supports projects related to its purpose through small grants (generally \$200-\$2000) to its Regional Groups and members. Projects should address a clear need related to the above mission statement and should involve partnerships at various levels. Regional Groups may submit proposals in support of regional meetings or conferences. In Grant Cycle Two, IAMSLIC members may submit proposals for travel support to attend the Annual Conference to present a paper or poster session or to contribute to the conference in another role.

CATEGORIES AND DEADLINES

Starting in 2004, grants will be awarded in two separate cycles:

Grant Cycle One -- Proposals for special projects and support for Regional Group meetings/conferences. Deadline for proposals is 10 January 2004. Grant Cycle Two -- Please note that proposals for registration waivers and travel grants for the 2004 conference in Hobart, Tasmania will be accepted during the second grant cycle. Deadline for travel grant proposals is 10 May 2004.

GRANT PROPOSAL GUIDELINES

1. Eligibility. IAMSLIC grants are available only to the Association's Regional Groups, for projects in which the Principal Investigator is a current IAMSLIC member, or to IAMSLIC members seeking support to attend the Annual Conference.
2. Proposal. The entire grant proposal should be two pages including the required components outlined below.

Please note: Copy-and-paste or type the Project Proposal outline below. Expand and complete sections as needed; brief supporting documentation may be included.

2004 IAMSLIC Grant Proposal Outline

Project Title:

Project Director:

Address:

Phone:

Fax:

Email:

Names and affiliations of partners or other investigators:

Project description:

Methods for evaluating project success:

Detailed budget:

Time line for the budget:

Total project cost:

Total amount requested:

3. Submittals. Submit proposals to the IAMSLIC Secretary. Receipt will be acknowledged promptly. PLEASE NOTE: Email submittals are preferred!:

Elizabeth Winiarz

Library

University of Massachusetts, Dartmouth
285 Old Westport Rd.

North Dartmouth, MA 02747-2300

U.S.A.

Email: ewiniarz@umassd.edu

Tel: 1 508 999-8696
Fax: 1 508 999-9240

4. Report. If funding is given, you will be responsible for providing a written, final report (including a project summary and evaluation) and for presenting the project at the next Annual Conference.

For further information, please contact:

Tel: 1 831 582-3793, Fax: 1 831 582-3354

GRANT CYCLE

November: Announcement of the availability of Cycle One grant funds will be posted to the mailing list and announced in newsletter. Guidelines are listed above.

10 January: Completed grant proposals will be submitted to the IAMSLIC Secretary, preferably in electronic form. The Secretary will forward copies to all Executive Board members, who will review the grant proposals and will select projects for funding.

31 January: Cycle One grant recipients/projects will be announced in the newsletter and on the mailing list. Monies for the awarded grants will be available for distribution in February.

February/March: Announcement of the availability of Cycle Two travel grants will be posted to the mailing list and announced in newsletter.

10 May: Completed travel grant proposals will be submitted to the IAMSLIC Secretary, preferably in electronic form. The Secretary will forward all proposals to the senior President-Elect, who will review the grant proposals in conjunction with the Conference Committee and will select individuals for funding. Recipients will be notified by the President-Elect as soon as possible after 31 May.

September/October: Grant recipients will present a project summary or progress report at the Annual Conference. This report may be done in person or

submitted to the Secretary to be read at one of the general business meetings.

October: At or immediately following the Annual Conference, the Executive Board will review the Association's budget to determine if sufficient surplus funds are available to instigate a granting cycle and, if so, will determine how much will be made available.

Bibliographies as education and outreach tools: an update, by Janet Webster

Janet Webster has been working on how to construct and use bibliographies in a more interactive and practical way for targeted audiences. The two projects have met with mixed results. Both are interesting examples of how to use bibliographies.

Seafood Technology Project

Dr. Ed Kolbe, Oregon Sea Grant Engineering Specialist, and Janet Webster, Oregon State University Librarian, created this bibliography and its sections believing that better access to information on current practices and emerging technologies is one strategy to address the challenges of the changing industry. We are attempting to maintain a system to identify important information - both published and unpublished, set up a Web-based search procedure for this information, and ensure that once identified, the searcher can get a copy, either electronically or in print. Complete descriptions of the original plan and final report are available at <http://osulibrary.orst.edu/guin/seafood/index.html>. The final report is a frank analysis of the challenges of the project.

As part of the Seafood Technology Bibliography Project, we thought long and hard about the philosophy and mechanics of creating bibliographies. If you are interested in creating your own bibliography, consider consulting the following:

How to Create a Bibliography. Webster, Janet G. 2003. Journal of Extension 41 (3) Available: <http://www.joe.org/joe/2003june/tt1.shtml>

This article outlines the steps needed to create a coherent and useful bibliography. Very practical!

A Bibliographic 'Handbook.'

<http://osulibrary.oregonstate.edu/guin/seafood/Handbook.pdf>

We combined elements of the philosophy described in the last article cited with our practical experience. This would be helpful if you are beginning a project or if you are troubleshooting using ProCite to create a bibliography.

Bibliographies as an Extension Outreach Tool: An Old Method in a New Age. Webster, Janet G. 2003. Journal of Extension 41(3) Available:

<http://www.joe.org/joe/2003june/a7.shtml>

This is an overview of two projects, including the Seafood Technology Project.

<http://osulibrary.orst.edu/guin/seafood/index.html>

Yaquina Bay Bibliography

<http://osulibrary.orst.edu/guin/yqbib.html>

Estuaries are once again emerging as important ecosystems for scientific study. Consequently, knowledge of what research has been conducted helps us identify benchmarks and plan new projects. A comprehensive bibliography of published research, technical reports, local documents, and data sets is one means of recording this knowledge. Yaquina Bay, located in Oregon's Lincoln County, has been studied for decades, at times aggressively so. With the renewed interest in Yaquina Bay as a research site, Oregon Sea Grant and the Environmental Protection Agency generously funded this bibliography of over 1100 records. It was compiled in ProCite and posted to the web using WebPoster. An ongoing issue is the lack of support for WebPoster, so Janet is interested in how others are translating bibliographic databases created in ProCite and EndNote to a web searchable system.

An interesting feature of the Yaquina Bay Bibliography is the map interface. I worked with two students on this. We began thinking that we could export the ProCite information as a data layer using latitude/longitude as the common field. It was not easy as we did not have access to a complete ArcView system and ongoing expertise.

So, we used imagemaps instead. The final report on the project including an explanation of using imagemaps is available at

<http://osulibrary.orst.edu/guin/finalreport.pdf>

**COLLEAGUE CONNECTION, collected by
Joan Parker**

The search for Charles McFadden's replacement as Library Director at the Virginia Institute of Marine Science (VIMS) is underway. The position was announced and candidates have been interviewed. VIMS Library staff will announce their new director to IAMSLIC on the list or in a forthcoming issue of the newsletter. Thanks to Marilyn Lewis, Acting Library Director, for this update.

(From Pam Mofjeld, former head Fisheries Oceanography Library at the University of Washington)

A few lines of greetings to my IAMSLIC buddies in response to Joan Parker's "where are you and what is UWorld Express?". For the past several years I worked with a consortium of academic libraries in Washington State on a union catalog and borrowing system; Cascade. During the past year we merged Cascade with the Orbis system to create the Orbis Cascade Alliance; <http://summit.orbiscascade.org/> This was such a success it eliminated my position which led to my now being the head of a unit called UWorld Express.

No, we are not a package expediter, though a patron did want to ship with us. UWorld Express encompasses interlibrary borrowing, lending, fee-based document delivery, as well as the lending and borrowing through the Summit catalog. It's a new and interesting challenge for me. I have met many nice people but have to say the IAMSLIC folks still are dear to my heart. And alas, the conferences I have to attend are not in such wonderful locations, no t-shirt exchange, Guin auction or dancing.

Position Opening in 2005

Head of Information Services, World Maritime University

Reporting to the President, this information professional manages and delivers integrated information services in support of the University's teaching and research mission. Applicants must be

equally at home in the management of the library information systems and the University's computer network. Applicants must possess a master's degree in Library/Information Science (ALA, CILIP, or similar accreditations), knowledge of the Library of Congress classification system and have at least six years of progressively higher management experience in library systems/IT applications and networks. Applicants must demonstrate accomplishment as a hands-on administrator and innovator in communication and presentation skills. Fluency in English is essential, as well as effective communication skills in an internationally diverse community.

The salary is in the range of US\$ 63,000 to US\$74,000 (free of income tax), according to background and experience. In addition to a tax-free salary, WMU offers a very attractive benefits package, designed to attract candidates of the highest calibre. Relocation expenses to Malmo are available to the successful appointees. Start date: November 2004.

The World Maritime University (WMU) was established in 1983 by the International Maritime Organization, a specialized agency of the United Nations. WMU has gained an excellent reputation as a global centre for advanced education, training and research for specialist personnel from the international maritime community. WMU offers a Master of Science in Maritime Affairs and a Ph.D. in International Maritime and Commercial Law.

Further information about the University (<http://www.wmu.se/>) and the position is available from the Office of the President: +46-40-35 63 20, fax: +46-40-12 84 42, email: eva.holten@wmu.se. David Moulder, Librarian, World Maritime University, PO Box 500, S-201 24 Malmo, Sweden Phone: +46 (40) 35 63 42, Fax: +46 (40) 12 84 42, Email: david.moulder@wmu.se

Beth Avery reports that she has been elected v.p./president elect of the Mountain Plains Library Association.

UPCOMING MEETINGS

Cyamus 2004 meeting will be in Vancouver, BC. A group of BC Cyamids including Sally Taylor,

Treva Ricou, Marcia Croy van Wely and Teri Tarita have begun planning. The meeting will be centered in the downtown Vancouver area, with a likely day session at the University of British Columbia.

Proposed dates are Wednesday evening, 3 March 2004, through Saturday 6 March 2004. Conference site is being developed at:

<http://library.csumb.edu/cyamus/index.html>

SAIL 2004 meeting will be held at the University of Texas Marine Science Institute, Port Aransas, TX. Hosted by Liz DeHart and Denise Landry-Hyde, from

Texas A&M, Corpus Christi, May 11-14, 2004.

Conference site is being developed at:

<http://mrl.cofc.edu/sail/2004frameset.html>

The Seventh Annual Conference of the Atmospheric Science Librarians International (ASLI) will be held January 14-16, 2004, in Seattle, Washington, in conjunction with the 84th Annual

Meeting of the American Meteorological Society (AMS). The ASLI program can be found at

<http://www.lib.noaa.gov/asli/asli2004program.html>

and registration is at

<http://www.lib.noaa.gov/asli/asli2004regis.html>.

ASLI members would be delighted to have IAMSILIC members attend and participate in the conference.

LISTSERVE DISCUSSIONS FROM MEMBERS

Pauline Simpson [ps@soc.soton.ac.uk] reports:

OSI is pleased to announce the release of the [Guide to Institutional Repository Software](#). The guide describes the five open source, OAI-compliant

systems currently available. As many institutions are developing repositories, OSI thought it would be helpful to produce such a guide so that each institution could select the software best suited to meet its needs. Included in the guide is a brief narrative overview of each system followed by a summary of the systems technical features. The guide will be updated as additional systems are developed. To view the guide, please see: <http://www.soros.org/openaccess/software/>

Ann Devenish, Pauline Simpson, and Janet Webster have contributed various wordings for scientists to use to retain copyright for Web distribution. Please see the emails below for additional information:

Ann started out the exchange by suggesting wording from SPARC:

Sample Copyright Letter

From SPARC (Scholarly Publishing and Academic Resources Coalition)

http://www.arl.org/create/faculty/issues/manage_ex1.html

Sample Amendment to Copyright Agreement
From SPARC (Scholarly Publishing and Academic Resources Coalition) Courtesy of Scott Bennett

http://www.arl.org/create/faculty/issues/manage_ex2.html

Pauline Simpson submitted the URL for Publishers Copyright Agreements

<http://www.lboro.ac.uk/departments/ls/disresearch/romeo/>

Go to the page and look for the section entitled Copyright Policies. This document is the result of a survey by Project ROMEO. Pauline also suggested the following paragraph that authors can attach to their copyright transfer form.

"I hereby transfer to <publisher or journal> all rights to sell or lease the text (on-paper and on-line) of my paper <paper title>. I retain the right to distribute it for free for scholarly/scientific purposes, in particular, the right to self-archive it publicly online on the World Wide Web. The author/s hereby assert their moral rights."

Janet Webster's message [IAMSLIC:3613] Info: Copyright positions of Science & Nature was a good explanation of the copyright stance of Science & Nature in regards to scientists making their work available via the Web.
